

KookIndia

Investor Memorandum, Product Blueprint & Developer Guide

Author / Lead Engineering: Nithin Joseph & Engineering Team

Version: 1.0 (Production-Ready Prototype)

Target Market: India Tier-1 Cities (Bangalore, Gurgaon, Mumbai, Hyderabad, Pune, NCR)

Repository Path: C:\Nithin-Learning\Projects\kookindia

1. Executive Summary

KookIndia is a full-stack, hyperlocal food marketplace designed to empower India's 300 Million+ homemakers and regional home chefs. The platform connects urban professionals, students, and families with verified home cooks delivering authentic regional meals, daily tiffin subscriptions, and party catering.

Unlike commercial delivery platforms (Zomato / Swiggy), KookIndia operates on a **Pre-Order & Prepared Batch** model, allowing home cooks to monetize their culinary skills with 0 upfront cloud-kitchen overhead and lower platform commissions (12-15% vs 25-30%).

2. Market Size & Opportunity

Segment	Market Value	Target Focus
TAM (Total Addressable)	\$40 Billion+	Indian Food Services Market
SAM (Serviceable Addressable)	\$6 Billion+	Home Tiffin & Regional Meals (Top 10 Cities)
SOM (Serviceable Obtainable)	\$150 Million GMV	3-Year Goal across 6 Initial Metros

3. Unit Economics & Monetization

Metric	Value (INR)	Percentage / Note
Average Order Value (AOV)	■380.00	100% (Food + Taxes)
Platform Commission (14%)	■53.20	14% of Dish Subtotal
Platform Hygiene Fee	■15.00	Fixed Per Order
Gross Margin / Order	■68.20	18% Gross Margin

Customer Acquisition Cost (CAC)	■120.00	Digital Ads & Referral Bonuses
Customer Lifetime Value (LTV)	■2,400.00	Based on 20 Orders/Year
LTV : CAC Ratio	20x	Best-in-class Unit Economics

4. Core Features & Prototype Architecture

1. Customer Marketplace (app/page.tsx)

Location Selector (Bangalore, Gurgaon, Mumbai, Hyderabad, Pune, NCR), regional cuisine filtering (North Indian, South Indian, Bengali, Gujarati, Jain), and Multi-Chef basket.

2. Multi-Chef Basket (components/CartDrawer.tsx)

Allows customers to purchase dishes from multiple neighborhood home cooks in a single checkout. Automatically calculates per-kitchen dispatch fees and splits sub-orders.

3. Kitchen Menu Detail (app/kitchen/[id]/page.tsx)

Showcases Chef Bio, FSSAI verification badge, prep lead times, portions remaining, and portion selectors.

4. Cook Partner Dashboard (app/cook/dashboard/page.tsx)

Homemaker Control Panel: Kitchen OPEN/CLOSED toggle, Photo Upload file picker with live preview, Advance Pre-Batch setup (Ready Batch vs Made-to-Order), Dish Modifier (Modify Dish modal), and Bulk Order Status Actions (ACCEPTED, COOKING, DISPATCHED, DELIVERED).

5. Admin Operations Portal (app/admin/page.tsx)

Platform Management: FSSAI verification queue for pending home kitchens, virtual kitchen photo audits, and Customer Support & Complaints Resolution Center.

6. Live Order Tracking (app/order/[id]/page.tsx)

4-step live status timeline: Placed → Accepted → Cooking → Dispatched with Dunzo/Porter → Delivered.

5. Developer Tech Stack & Data Models

Component	Technology Selection
Frontend Framework	Next.js 16.3 (App Router) + React 19 + TypeScript
Styling System	Tailwind CSS v4 + Vanilla CSS Design Tokens
Icon Library	Lucide React
Database Layer	PostgreSQL (Supabase compatible) with In-Memory DB Engine (lib/db.ts)
Logistics Partners	Dunzo / Porter / Borzo / Shadowfax API Integrations
Payment Gateway	Razorpay / PhonePe (UPI, Credit/Debit, COD)

6. Developer Setup & Local Execution

Follow these instructions to run the local prototype repository on your machine:

1. Open Terminal or PowerShell.
2. Navigate to project folder: `cd C:\Nithin-Learning\Projects\kookindia`
3. Install dependencies: `npm install`
4. Start Next.js dev server: `npm run dev`
5. Open Browser: `http://localhost:3000`
6. Admin Portal: `http://localhost:3000/admin/login` (admin@kookindia.com / admin123)
7. Cook Partner Dashboard: `http://localhost:3000/cook/dashboard`
